

Option Care Women's Health

Together We Care For Your High – Risk Obstetrical Patients

Option Care Women's Health provides quality high-risk obstetrical care delivered by specialized nurses for management of hyperemesis gravidarum (excessive nausea and vomiting pregnancy program), preterm labor, pregnancy-induced hypertension, gestational diabetes management and compliance coaching and education.

In addition to home visits, our 24/7 Call Center means that our highly trained OB nurses are only a phone call away when a patient or family member has a question or concern. Not only does care in familiar surroundings improve patient well-being, it also provides a more cost effective solution for healthcare providers.

Our services include:

Nausea and Vomiting Pregnancy Program (Hyperemesis Gravidarum)

- Delivery and administration of antiemetic therapy
- Ondansetron pumps (Subcutaneous)
- Metoclopramide pumps (Subcutaneous)
- In-home intravenous (IV) hydration
- In-home intravenous (IV) ondansetron
- Home Parenteral (PN) Nutrition
- PICC line maintenance

Preterm Birth Reduction Program

- Delivery and administration of hydroxyprogesterone caproate medication
- No specialty pharmacy needed
- Average start time of <72 hours

Gestational Diabetes Management

- Patient education and daily coaching
- Customized diet plans
- Insulin management

Pregnancy-Induced Hypertension Management

- In-home monitoring
